

FraudSleuth, Powered by PropertyInfo

With the recent increase in fraud, a tool has been developed for counties to offer a service to their constituents. FraudSleuth allows constituents to conduct a simple name search to search their name for any documents that might have been recorded against their name/property. This tool is not to alarm but to offer a way to empower the constituents to protect themselves against possible fraud.

This is another step in prevention - promotion of awareness.

If someone identifies suspicious activity, they can contact the county and ask for additional investigation. This tool is especially good for those individuals that predators love to prey on ~ snow birds, the elderly, remote property owners.

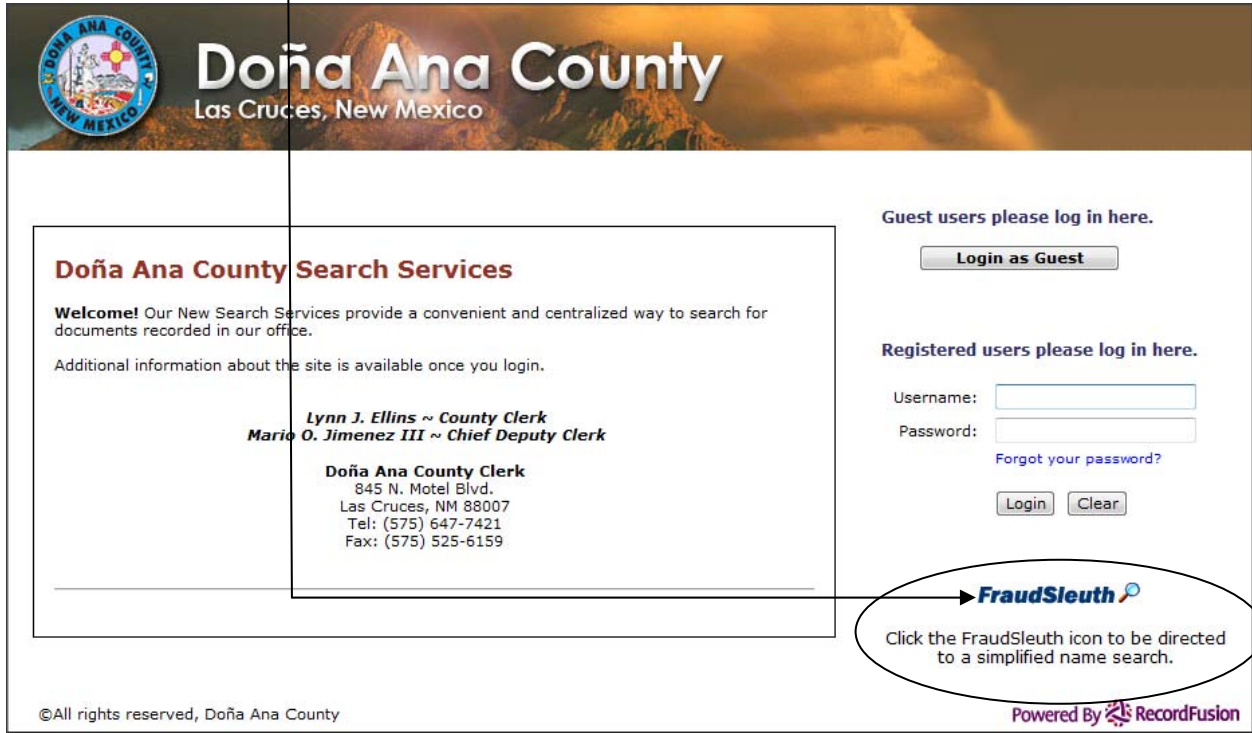

FraudSleuth is a tool that compliments other efforts toward preventing and defeating fraud.
