

“SOLE SOURCE” PROCUREMENT JUSTIFICATION

Sole source purchases are goods and services available from only one vendor. There may be just one vendor because of patents or copyrights or simply because the vendor is the only one which supplies the good or service. Using Department must provide a written explanation as to why only this particular product/service is acceptable and why no other will be suitable or acceptable to meet the need. A quote must accompany this form.

Department name: Sheriff's Department

1. Name of product or service: OD Tactical Eyewear
2. Name of product manufacturer: OD Tactical eyewear USA
3. Name of “sole” product supplier or service provider: LE Supply Portal
4. Describe in general terms the product/service you are requesting and the intended application.
The OD Tactical Eyewear is a hardware software combo where Tactical ballistic resistant Eyewear is combined with an onboard camera and facial recognition.
5. Describe the unique features/capabilities/characteristics that distinguish it from other products/services.
The eyewear is used by our tactical SWAT officers for high risk warrant search and apprehension. Suspects photos are uploaded into a specific data base and each operator wearing the glasses while on the warrant service will have immediate facial recognition alerts when in contacted with wanted persons.
6. How did you determine there was only one source for the product or service? Provide information on the research that was performed to locate suppliers for this product(s) or service(s). (Please furnish names, addresses and other documentation). I have attended multiple US wide Law Enforcement trade Shows and looked for this item to include International Assoc of Chief's of Police IACP and the National Sheriff's Assoc NSA as well as the Western States Sheriff's Assoc. In all of these trade shows these are the only items of their kind available for Law Enforcement purposes with military proving.
7. What product supplier or service provider has your Department used until now to satisfy similar requirements? None this is cutting edge.

Signature of Department Head

11-15-17

Date

(Attach Quote and Use Additional Sheets As Necessary)

**This form is used by Purchasing Department to determine if a “Sole Source” procurement criterion is met. Completing this form does not guarantee approval of this type of procurement.

OD Tactical Eyewear – The Answer to Two Global Challenges

The greatest challenges which police departments and security forces worldwide, will face in the coming years are almost universally acknowledged to be dealing with massive civil disobedience and the ever-increasing risk of terrorism.

The single greatest spark that can ignite large-scale rioting or violent protest is the feeling, on behalf of minority communities, that individual police officers will, under cover of authority, mistreat them and get away with it.

At the same time, the greatest fear of police officers is that they will become the victims of an unjustified accusation, which may well cost them their career, their liberty, or even their lives. Thus, in the wake of Ferguson and Charleston, as well as riots throughout Europe, the Middle East, Africa and South Asia, more and more police departments have turned toward the use of body-worn cameras. Unfortunately, body cams are not the answer. Body cams are worn at chest-level, and point straight ahead. They are an outdated technology which sees what the officer's chest sees, not what his eyes see.

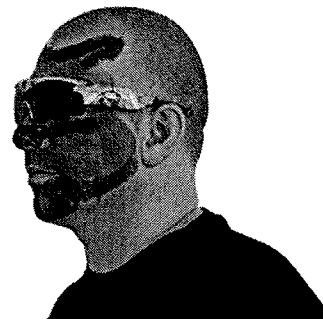

OD Tactical Eyewear is a state-of-the-art pair of lightweight sunglasses, which provide the highest standard, combat tested, audio/visual/facial recognition technology at the most competitive prices on the market today.

In the field of terrorism, virtually every major city in the world is now vulnerable to either large-scale or so-called "Lone Wolf" attacks. From Paris and Brussels, Spain and London to San Bernardino, Boston, New York and Orlando, Tel Aviv to Mumbai or Nairobi, local police departments have been thrust onto the front line on the war against terrorism.

Utilizing cutting edge, Israeli facial recognition technology, which can interface with the client's data base, the soldier in the field, or officer on the beat, will be able to access everything that is known about a suspect, not by running his finger prints, but simply by looking at him or her. It works equally in crowds and low light conditions, and was already operational during President Trump's recent visit to Israel.

Both types of O.D. Tactical Eyewear have blue tooth/Wi-Fi capabilities for real time streaming to smart phones, pad devices, mobile units or command centers.
